

ABSTRACT OF THE DISCLOSURE

10046172-011602  
20910-2719404

A terminal-side communications control unit ~~41~~ makes  
a request to a server for retrieving an instruction file that  
5 describes an instruction for transmitting transmission data.  
The server transmits the instruction file in response to the  
request for retrieving the instruction file. On receiving the  
instruction file, the terminal-side communications control unit  
~~41~~ causes an application executing unit ~~42~~ to execute an  
10 application, and also forwards the instruction file to a  
transmission data generating unit ~~44~~. On receiving the  
instruction file, the transmission data generating part ~~44~~ refers  
to the instruction file to generate, from generated data stored  
in a generated data storage unit ~~43~~, transmission data to be  
15 transmitted to the server.
